The Journal of Infectious Diseases

VOLUME 94, JANUARY-JUNE, 1954

TABLE OF CONTENTS

No. 1, January–February, 1954

PAGE

Harry Rubin. A disease in captive egrets caused by a virus of the psittacosis-lymphogranuloma venereum group 1

L. J. Goldberg, H. M. S. Watkins, M. S. Dolmatz, and N. A. Schlamm. Studies on the experimental epidemiology of respiratory infections. VI. The relationship between dose of microorganisms and subsequent infection or death of a host 9

S. B. Salvin. Cultural and serologic studies on nonfatal histoplasmosis in mice, hamsters, and guinea pigs 22

Thomas M. Floyd and Chester F. Blakemore. Isolation of human enteric pathogens from ready-to-eat meats from butcher shops in Cairo, Egypt. 30

G. M. Dack, H. Sugiyama, Francis J. Owens, and Joseph B. Kirsner. Failure to produce illness in human volunteers fed *Bacillus cereus* and *Clostridium perfringens* 34

Sheldon G. Cohen and Walter E. Mokychic. The effect of leukopenia (by nitrogen mustard) and reticulo-endothelial blockade (by thorium dioxide) on tuberculin cutaneous sensitivity 39

Myron S. Silverman, Paul H. Chin, Vivian Greenman, and John C. Young. The cause of increased susceptibility of mice to avirulent *Pasteurella pestis* after exposure to a sublethal dose of X irradiation 47

Theodore Burnstein and James A. Baker. Leptospirosis in swine caused by *Leptospira pomona* 53

P. N. Edmunds. Further klebsiella capsule types 65

Kyoichi Takeda. Agglutination of bacteria (*Hemophilus pertussis* and *Salmonella typhosa*) in vitro by human blood lymphocytes and cytoplasmic extrusions of lymphocytes 72

Edith D. Box, Wendell G. Gingrich, and Bettie L. Celaya. Standardization of a curative test with *Plasmodium berghei* in white mice 78

Willy Burgdorfer and Edgar D. Pickens. A technique employing embryonated chicken eggs for the infection of argasid ticks with *Coxiella burnetii*, *Bacterium tularense*, *Leptospira icterohaemorrhagiae*, and western equine encephalitis virus 84

Joseph Q. Heplar, C. E. Clifton, Sidney Raffel, and Clarice M. Futrelle. Virulence of the tubercle bacillus. I. Effect of oxygen tension upon respiration of virulent and avirulent bacilli 90

L. Ruth Guy, Sidney Raffel, and C. E. Clifton. Virulence of the tubercle bacillus. II. Effect of oxygen tension upon growth of virulent and avirulent bacilli 99

No. 2, March–April, 1954

Emilio Weiss and Jwo S. Huang. The infected cell count method of titration of feline pneumonitis virus 107

G. M. Urquhart, W. Mulligan, and F. W. Jennings. Artificial immunity to *Fasciola hepatica* in rabbits. I. Some studies with protein antigens of *F. hepatica* 126

PAGE

W. H. Ewing, K. E. Tanner, and D. A. Dennard. The Providence group: an intermediate group of enteric bacteria 134

Alex Bakerspigel. A preferred method for the routine identification of candida 141

L. Joe Berry, Penelope Merritt, and Roland B. Mitchell. The relation of the tricarboxylic acid cycle to bacterial infection. III. Comparison of survival time of mice infected with different pathogens and given Krebs cycle inhibitors and intermediates 144

L. Joe Berry, Kathryn H. Ehlers, and Roland B. Mitchell. The relation of the tricarboxylic acid cycle to bacterial infection. IV. The effect of three metabolic inhibitors and *Salmonella typhimurium* on the citric acid content of mouse tissues 152

Ira Singer. The effect of splenectomy or phenylhydrazine on infections with *Plasmodium berghei* in the white mouse 159

Ira Singer. The effect of cortisone on infections with *Plasmodium berghei* in the white mouse 164

Clay G. Huff. Changes in host-cell preferences in malarial parasites and their relation to splenic reticular cells 173

Robert Rausch. Studies on the helminth fauna of Alaska. XX. The histogenesis of the alveolar larva of echinococcus species 178

Victor H. Haas. Some relationships between lymphocytic choriomeningitis (LCM) virus and mice 187

David W. Talmage, Howard R. Baker, and Wayne Akeson. The separation and analysis of labelled antibodies 199

No. 3, May–June, 1954

A. L. Olitzki and D. Sulitzeanu. The use of streptomycin-resistant and non-resistant strains for the determination of the immunizing effect of living *Brucella abortus* vaccines in white mice 213

Avivah Zuckerman and Meir Yoeli. Age and sex as factors influencing *Plasmodium berghei* infections in intact and splenectomized rats 225

Ira Singer. The course of infection with *Plasmodium berghei* in inbred CF 1 mice 237

Ira Singer. The cellular reactions to infections with *Plasmodium berghei* in the white mouse 241

John E. Larsh, Jr. and George J. Race. A histopathologic study of the anterior small intestine of immunized and nonimmunized mice infected with *Trichinella spiralis* 262

C. A. Evans, Velma C. Chambers, Wayne M. Smith, and Pamela H. Byatt. Growth of neurotropic viruses in extraneural tissues. V. Survey of tissues of various animal species for capacity to support multiplication of poliomyelitis virus in vitro 273

Herbert A. Wenner, Robert W. Menges, and Gerald S. Harshfield. Sporadic bovine encephalomyelitis. 3. Reproduction of the disease, with particular reference to the role of poliomyelitis viruses in experimental infection in calves 284

Morris D. Schneider. Polysaccharide antigens of leptospires 297

Abram B. Stavitsky. Participation of the popliteal lymph node and spleen in the production of diphtheria antitoxin in the rabbit 306

Index 319

GENERAL INDEX, VOLUME 94, NO. 1, 2, AND 3 (1954)

Agglutination, of bacteria (*Hemophilus pertussis* and *Salmonella typhosa*) in vitro by human blood lymphocytes and cytoplasmic extrusions of lymphocytes, 72
Akeson, Wayne: The separation and analysis of labelled antibodies, 199

Bacillus cereus, Failure to produce illness in human volunteers fed *B. cereus* and *Clostridium perfringens*, 34
Baker, Howard R.: The separation and analysis of labelled antibodies, 199
Baker, James A.: Leptospirosis in swine caused by *Leptospira pomona*, 53
Bakerspigel, Alex: A preferred method of the routine identification of candida, 141
Berry, L. Joe: The relation of the tricarboxylic acid cycle to bacterial infection.
III. Comparison of survival time of mice infected with different pathogens and given Krebs cycle inhibitors and intermediates, 144
IV. The effect of three metabolic inhibitors and *Salmonella typhimurium* on the citric acid content of mouse tissues, 152
Blakemore, Chester F.: Isolation of human enteric pathogens from ready-to-eat meats from butcher shops in Cairo, Egypt, 30
Box, Edith D.: Standardization of a curative test with *Plasmodium berghei* in white mice, 78
Brucella abortus, The use of streptomycin-resistant and nonresistant strains for the determination of the immunizing effect of living *Brucella abortus* vaccines in white mice, 213
Burgdorfer, Willy: A technique employing embryonated chicken eggs for the infection of argasid ticks with *Coxiella burnetii*, *Bacterium tularense*, *Leptospira icterohaemorrhagiae*, and western equine encephalitis virus, 84
Burnstein, Theodore: Leptospirosis in swine caused by *Leptospira pomona*, 53
Byatt, Pamela H.: Growth of neurotropic viruses in extraneural tissues.
V. Survey of tissues of various animal species for capacity to support multiplication of poliomyelitis virus in vitro, 273

Candida, A preferred method for the routine identification of, 141
Celaya, Bettie L.: Standardization of a curative test with *Plasmodium berghei* in white mice, 78
Chambers, Velma C.: Growth of neurotropic viruses in extraneural tissues.
V. Survey of tissues of various animal species for capacity to support multiplication of poliomyelitis virus in vitro, 273
Chin, Paul H.: The cause of increased susceptibility of mice to avirulent *Pasteurella pestis* after exposure to a sublethal dose of X irradiation, 47
Clostridium perfringens, Failure to produce illness in human volunteers fed *Bacillus cereus* and *Cl. perfringens*, 34
Cohen, Sheldon G.: The effect of leukopenia (by nitrogen mustard) and reticulo-endothelial blockade (by thorium dioxide) on tuberculin cutaneous sensitivity, 39

Dack, G. M.: Failure to produce illness in human volunteers fed *Bacillus cereus* and *Clostridium perfringens*, 34
Dennard, D. A.: The Providence group: an intermediate group of enteric bacteria, 134
Diphtheria, Participation of the popliteal lymph node and spleen in the production of diphtheria antitoxin in the rabbit, 306
Dolmatz, M. S.: Studies on the experimental epidemiology of respiratory infections.
VI. The relationship between dose of microorganisms and subsequent infection or death of a host, 9

Echinococcus, Studies on the helminth fauna of Alaska, 178
Edmunds, P. N.: Further klebsiella capsule types, 65
Ehlers, Kathryn H.: The relation of tricarboxylic acid cycle to bacterial infection.
IV. The effect of three metabolic inhibitors and *Salmonella typhimurium* on the citric acid content of mouse tissues, 152
Enteric bacteria, Isolation of human enteric pathogens from ready-to-eat meats from butcher shops in Cairo, Egypt, 30
The Providence group: an intermediate group of, 134
Evans, C. A.: Growth of neurotropic viruses in extraneural tissues.
V. Survey of tissues of various animal species for capacity to support multiplication of poliomyelitis virus in vitro, 273
Ewing, W. H.: The Providence group: an intermediate group of enteric bacteria, 134

Fasciola hepatica, Artificial immunity to, in rabbits, 126
Floyd, Thomas M.: Isolation of human enteric pathogens from ready-to-eat meats from butcher shops in Cairo, Egypt, 30

Gingrich, Wendell D.: Standardization of a curative test with *Plasmodium berghei* in white mice, 78
Goldberg, L. J.: Studies on the experimental epidemiology of respiratory infections.
VI. The relationship between dose of microorganisms and subsequent infection or death of a host, 9
Greenman, Vivian: The cause of increased susceptibility of mice to avirulent *Pasteurella pestis* after exposure to a sublethal dose of X irradiation, 47

Haas, Victor H.: Some relationships between lymphocytic choriomeningitis (LCM) virus and mice, 187
Harshfield, Gerald S.: Sporadic bovine encephalomyelitis.
3. Reproduction of the disease, with particular reference to the role of poliomyelitis viruses in experimental infection in calves, 284
Histoplasmosis, Cultural and serologic studies on nonfatal histoplasmosis in mice, hamsters, and guinea pigs, 22
Huang, Jwo S.: The infected cell count method of titration of feline pneumonitis virus, 107
Huff, Clay G.: Changes in host-cell preferences in malarial parasites and their relation to splenic reticular cells, 173

Jennings, F. W.: Artificial immunity to *Fasciola hepatica* in rabbits.
I. Some studies with protein antigens of *F. hepatica*, 126

Kirsner, Joseph B.: Failure to produce illness in human volunteers fed *Bacillus cereus* and *Clostridium perfringens*, 34
Klebsiella, Further klebsiella capsule types, 65

Labelled antibodies, The separation and analysis of, 199
Larsh, John E., Jr.: A histopathologic study of the anterior small intestine of immunized and nonimmunized mice infected with *Trichinella spiralis*, 262
Leptospirosis, in swine caused by *Leptospira pomona*, 53
Polysaccharide antigens of leptospires, 297
Lymphocytic choriomeningitis virus, Some relationships between, and mice, 187

Malaria, Changes in host-cell preferences in malarial parasites and their relation to splenic reticular cells, 173
Menges, Robert W.: Sporadic bovine encephalomyelitis.
3. Reproduction of the disease, with particular reference to the role of poliomyelitis viruses in experimental infection in calves, 284
Merritt, Penelope: The relation of the tricarboxylic acid cycle to bacterial infection.
III. Comparison of survival time of mice infected with different pathogens and given Krebs cycle inhibitors and intermediates, 144
Mitchell, Roland B.: The relation of the tricarboxylic acid cycle to bacterial infection.
III. Comparison of survival time of mice infected with different pathogens and given Krebs cycle inhibitors and intermediates, 144
IV. The effect of three metabolic inhibitors and *Salmonella typhimurium* on the citric acid content of mouse tissues, 152
Mokychic, Walter E.: The effect of leukopenia (by nitrogen mustard) and reticulo-endothelial blockade (by thorium dioxide) on tuberculin cutaneous sensitivity, 39
Mulligan, W.: Artificial immunity to *Fasciola hepatica* in rabbits.
I. Some studies with protein antigens of *F. hepatica*, 126

Olitzki, A. L.: The use of streptomycin-resistant and nonresistant strains for the determination of the immunizing effect of living *Brucella abortus* vaccines in white mice 213
Owens, Francis J.: Failure to produce illness in human volunteers fed *Bacillus cereus* and *Clostridium perfringens*, 34

Pasteurella pestis, The cause of increased susceptibility of mice to avirulent *Past. pestis* after exposure to a sublethal dose of X irradiation, 47
Plasmodium berghei, Standardization of a curative test with *P. berghei* in white mice, 78

The effect of splenectomy or phenylhydrazine on infections with, in the white mouse, 159
The effect of cortisone on infections with, in the white mouse, 164
Age and sex as factors influencing *P. berghei* infections in intact and splenectomized rats, 225
The course of infection with, in inbred CF 1 mice, 237
The cellular reactions to infections with, in the white mouse, 241
Pneumonitis, The infected cell count method of titration of feline pneumonitis virus, 107
Poliomyelitis, Growth of neurotropic viruses in extraneural tissues, 273
Sporadic bovine encephalomyelitis, 284
Psittacosis, A disease in captive egrets caused by a virus of the psittacosis-lymphogranuloma venereum group, 1

Race, George J.: A histopathologic study of the anterior small intestine of immunized and nonimmunized mice infected with *Trichinella spiralis*, 262
Rausch, Robert: Studies on the helminth fauna of Alaska.
XX. The histogenesis of the alveolar larva of echinococcus species, 178
Respiratory infections, Studies on the experimental epidemiology of, 9
Rubin, Harry: A disease in captive egrets caused by a virus of the psittacosis-lymphogranuloma venereum group, 1

Salvin, S. B.: Cultural and serologic studies on nonfatal histoplasmosis in mice, hamsters, and guinea pigs, 22
Schlamm, N. A.: Studies on the experimental epidemiology of respiratory infections.
VI. The relationship between dose of microorganisms and subsequent infection or death of a host, 9
Schneider, Morris D.: Polysaccharide antigens of leptospires, 297
Silverman, Myron S.: The cause of increased susceptibility of mice to avirulent *Pasteurella pestis* after exposure to a sublethal dose of X irradiation, 47
Singer, Ira: The effect of splenectomy or phenylhydrazine on infections with *Plasmodium berghei* in the white mouse, 159
The effect of cortisone on infections with *P. berghei* in the white mouse, 164
The course of infection with *P. berghei* in inbred CF 1 mice, 237
The cellular reactions to infections with *P. berghei* in the white mouse, 241
Smith, Wayne M.: Growth of neurotropic viruses in extraneural tissues.
V. Survey of tissues of various animal species for capacity to support multiplication of poliomyelitis virus in vitro, 273
Stavitsky, Abram B.: Participation of the popliteal lymph node and spleen in the production of diphtheria antitoxin in the rabbit, 306
Sugiyama, H.: Failure to produce illness in human volunteers fed *Bacillus cereus* and *Clostridium perfringens*, 34
Sulitzeanu, D.: The use of streptomycin-resistant and nonresistant strains for the determination of the immunizing effect of living *Brucella abortus* vaccines in white mice, 213

Takeda, Kyoichi: Agglutination of bacteria (*Hemophilus pertusssis* and *Salmonella typhosa*) in vitro by human blood lymphocytes and. cytoplasmic extrusions of lymphocytes, 72
Talmage, David W.: The separation and analysis of labelled antibodies, 199
Tanner, K. E.: The Providence group: an intermediate group of enteric bacteria, 134
Trichinella spiralis, A histopathologic study of the anterior small intestine of immunized and nonimmunized mice infected with, 262
Tuberculin, The effect of leukopenia (by nitrogen mustard) and reticulo-endothelial blockade (by thorium dioxide) on tuberculin cutaneous sensitivity, 39

Urquhart, G. M.: Artificial immunity to *Fasciola hepatica* in rabbits.
I. Some studies with protein antigens of *F. hepatica*, 126

Watkins, H. M. S.: Studies on the experimental epidemiology of respiratory infections.
VI. The relationship between dose of microorganisms and subsequent infection or death of a host, 9
Weiss, Emilio: The infected cell count method of titration of feline pneumonitis virus, 107
Wenner, Herbert A.: Sporadic bovine encephalomyelitis.
3. Reproduction of the disease, with particular reference to the role of poliomyelitis viruses in experimental infection in calves, 284

X ray, The cause of increased susceptibility of mice to avirulent *Pasteurella pestis* after exposure to a sublethal dose of X irradiation, 47

Yoeli, Meir: Age and sex as factors influencing *Plasmodium berghei* infections in intact and splenectomized rats, 225
Young, John C.: The cause of increased susceptibility of mice to avirulent *Pasteurella pestis* after exposure to a sublethal dose of X irradiation, 47

Zuckerman, Avivah: Age and sex as factors influencing *Plasmodium berghei* infections in intact and splenectomized rats, 225

The Journal of Infectious Diseases

VOLUME 95, JULY-DECEMBER, 1954

TABLE OF CONTENTS

No. 1. July–August, 1954

PAGE

Noble P. Sherwood, David Paretsky, A. Nachtigall, A. R. McLain, and G. Thomas Truffelli. Studies on streptococci. V. A study of streptococcal proteinases 1

Robert M. Lewert and Chang-Ling Lee. Studies on the passage of helminth larvae through host tissues. I. Histochemical studies on the extracellular changes caused by penetrating larvae. II. Enzymatic activity of larvae in vitro and in vivo 13

John W. Osebold and Taka Inouye. Pathogenesis of *Listeria monocytogenes* infections in natural hosts. I. Rabbit studies 52

John W. Osebold and Taka Inouye. Pathogenesis of *Listeria monocytogenes* infections in natural hosts. II. Sheep studies 67

Melvin Rheins and John Finlay. The effect of ultrasonic irradiation on certain properties of influenza virus 79

José Oliver-González. Anti-egg precipitins in the serum of humans infected with *Schistosoma mansoni* 86

William Cantrell. The effect of oxophenarsine on the phosphate metabolism of *Trypanosoma equiperdum* in the rat 92

Donald A. Rowley, Robert T. Haberman, and Chester W. Emmons. Histoplasmosis: pathologic studies of fifty cats and fifty dogs from Loudoun County, Virginia 98

Eli M. Nadel, Joseph Greenberg, and G. Robert Coatney. The effect of malaria (*Plasmodium berghei*) on leukemia L_{1210} in mice 109

Joseph Greenberg, Eli M. Nadel, and G. Robert Coatney. Differences in survival of several inbred strains of mice and their hybrids infected with *Plasmodium berghei* 114

No. 2. September–October, 1954

William H. Taliaferro and Lucy Graves Taliaferro. Effect of X rays on hemolysin formation following various immunization and irradiation procedures 117

William H. Taliaferro and Lucy Graves Taliaferro. Further studies on the radiosensitive stages in hemolysin formation 134

Ronald M. Ferry and T. Grant Maple. Studies of the loss of viability of stored bacterial aerosols. I. *Micrococcus candidus* 142

George H. Scherr, James M. Severens, Peter Jurtshuk, Jr., and Charles L. Wittenberger. The effect of cortisone and somatotrophic hormone on vaccinia virus lesions and benzyl alcohol toxicity in the embryonated egg. 160

Clarence A. Sooter, Morris Schaeffer, Rachael Gorrie, and T. Aidan Cockburn. Transovarian passage of antibodies following naturally acquired encephalitis infection in birds 165

PAGE

W. C. Reeves, J. M. Sturgeon, E. M. French, and B. Brookman. Transovarian transmission of neutralizing substances to western equine and St. Louis encephalitis viruses by avian hosts 168

R. E. Kissling, Martha E. Eidson, and Donald D. Stamm. Transfer of maternal neutralizing antibodies against eastern equine encephalomyelitis virus in birds 179

Leonard Laskowski, Mearl F. Stanton, and Henry Pinkerton. Chemotherapeutic studies of alloxan, dehydroascorbic acid, and related compounds in murine haemobartonellosis 182

Roger W. Reed and Ballem H. Matheson. Experimental nephritis due to type specific streptococci. I. The effect of a single exposure to type 12 streptococci 191

Roger W. Reed and Ballem H. Matheson. Experimental nephritis due to type specific streptococci. II. The effect of repeated exposure to type 12 streptococci 202

No. 3. November-December, 1954

J. van der Hoeden. The pathogenicity of leptospiras to field rodents in Israel (a new test animal for use in leptospira research) 213

Frank M. Gogolak. The mouse erythrocyte hemagglutinin of feline pneumonitis virus 220

N. Joel Ehrenkranz and Laurens P. White. Hepatic function and other physiologic studies in monkeys with experimental pneumonic plague 226

Mildred M. Galton, Willa Dean Lowery, and Albert V. Hardy. Salmonella in fresh and smoked pork sausage 232

Mildred M. Galton, W. V. Smith, Hunter B. McElrath, and Albert B. Hardy. Salmonella in swine, cattle and the environment of abattoirs 236

L. Joe Berry and Roland B. Mitchell. Some metabolic aspects of host-parasite interaction using the albino mouse and *Salmonella typhimurium* 246

Hiroshi Mochizuki, Tamotsu Tomimura, and Takenori Oka. Cerebrospinal nematodiasis as a provoking factor in Japanese B encephalitis: an experimental approach 260

John H. Schwab and Dennis W. Watson. Host factors in experimental group A streptococcal infections. The role of tissue thromboplastin 267

J. B. Macdonald, R. M. Sutton, and M. L. Knoll. The production of fusospirochetal infections in guinea pigs with recombined pure cultures 275

Joseph Victor and Francis A. Beall. Mechanisms of citrate inhibition of phagocytosis and opsonization 285

Eugene D. Weinberg. The reversal of the toxicity of oxytetracycline (terramycin) by multivalent cations 291

J. K. Scott and J. N. Stannard. Relationship between *Bartonella muris* infection and acute radiation effects in the rat 302

GENERAL INDEX, VOLUME 95, NO. 1, 2, AND 3 (1954)

Aerosols, Studies of the loss of viability of stored bacterial aerosols, 142
Antibody transfer, Transovarian passage of antibodies following naturally acquired encephalitis infection in birds, 165
Transovarian transmission of neutralizing substances to western equine and St. Louis encephalitis viruses by avian hosts, 168
Transfer of maternal neutralizing antibodies against eastern equine encephalomyelitis virus in birds, 179

Bartonella, Chemotherapeutic studies of alloxan, dehydroascorbic acid, and related compounds in murine haemobartonellosis, 182
Bartonella muris, Relationship between *Bart. muris* infection and acute radiation effects in the rat, 302
Beall, Francis A.: Mechanisms of citrate inhibition of phagocytosis and opsonization, 285
Berry, L. Joe: Some metabolic aspects of host-parasite interaction using the albino mouse and *Salmonella typhimurium*, 246
Brookman, B.: Transovarian transmission of neutralizing substances to western equine and St. Louis encephalitis viruses by avian hosts, 168

Cantrell, William: The effect of oxophenarsine on the phosphate metabolism of *Trypanosoma equiperdum* in the rat, 92
Citrate inhibition, Mechanisms of, of phagocytosis and opsonization, 286
Coatney, G. Robert: The effect of malaria (*Plasmodium berghei*) on leukemia L_{1210} in mice, 109
Differences in survival of several inbred strains of mice and their hybrids infected with *Plasmodium berghei*, 114
Cockburn, T. Aidan: Transovarian passage of antibodies following naturally acquired encephalitis infection in birds, 165
Cortisone, The effect of, and somatotrophic hormone on vaccinia virus lesions and benzyl alcohol toxicity in the embryonated egg, 160

Ehrenkranz, N. Joel: Hepatic function and other physiologic studies in monkeys with experimental pneumonic plague, 226
Eidson, Martha E.: Transfer of maternal neutralizing antibodies against eastern equine encephalomyelitis virus in birds, 179
Emmons, Chester W.: Histoplasmosis: pathologic studies of fifty cats and fifty dogs from Loudoun County, Virginia, 98
Encephalitis, Transovarian passage of antibodies following naturally acquired encephalitis infection in birds, 165
Transovarian transmission of neutralizing substances to western equine and St. Louis encephalitis viruses by avian hosts, 168
Transfer of maternal neutralizing antibodies against eastern equine encephalomyelitis virus in birds, 179
Cerebrospinal nematodiasis as a provoking factor in Japanese B encephalitis, 260

Ferry, Ronald M.: Studies of the loss of viability of stored bacterial aerosols.
I. *Micrococcus candidus*, 142
Finlay, John: The effect of ultrasonic irradiation on certain properties of influenza virus, 79
French, E. M.: Transovarian transmission of neutralizing substances to western equine and St. Louis encephalitis viruses by avian hosts, 168

Galton, Mildred M.: Salmonella in fresh and smoked pork sausage, 232
Salmonella in swine, cattle and the environment of abattoirs, 236
Gogolak, Frank M.: The mouse erythrocyte hemagglutinin of feline pneumonitis virus, 220
Gorrie, Rachael: Transovarian passage of antibodies following naturally acquired encephalitis infection in birds, 165
Greenberg, Joseph: The effect of malaria (*Plasmodium berghei*) on leukemia L_{1210} in mice, 109
Differences in survival of several inbred strains of mice and their hybrids infected with *Plasmodium berghei*, 114

Haberman, Robert T.: Histoplasmosis: pathologic studies of fifty cats and fifty dogs from Loudoun County, Virginia, 98
Hardy, Albert V.: Salmonella in fresh and smoked pork sausage, 232
Salmonella in swine, cattle and the environment of abattoirs, 236
Histoplasmosis, pathologic studies of fifty cats and fifty dogs from Loudoun County, Virginia, 98

Influenza, The effect of ultrasonic irradiation on certain properties of influenza virus, 79
Inouye, Taka: Pathogenesis of *Listeria monocytogenes* infections in natural hosts.
I. Rabbit studies, 52
II. Sheep studies, 67

Differences in survival of several inbred strains of mice and their hybrids infected with, 114
Pneumonitis, The mouse erythrocyte hemagglutinin of feline pneumonitis virus, 220

Radiation, The effect of ultrasonic irradiation on certain properties of influenza virus, 79
Effect of X rays on hemolysin formation following various immunization and irradiation procedures, 117
Further studies on the radiosensitive stages in hemolysin formation, 134
Relationship between *Bartonella muris* infection and acute radiation effects in the rat, 302
Reed, Roger W.: Experimental nephritis due to type specific streptococci.
I. The effect of a single exposure to type 12 streptococci, 191
II. The effect of repeated exposure to type 12 streptococci, 202
Reeves, W. C.: Transovarian transmission of neutralizing substances to western equine and St. Louis encephalitis viruses by avian hosts, 168
Rheins, Melvin: The effect of ultrasonic irradiation on certain properties of influenza virus, 79
Rowley, Donald A.: Histoplasmosis: pathologic studies of fifty cats and fifty dogs from Loudoun County, Virginia, 98

Salmonella, in fresh and smoked pork sausage, 232
In swine, cattle and the environment of abattoirs, 236
Some metabolic aspects of host-parasite interaction using the albino mouse and *Salmonella typhimurium*, 246
Schaeffer, Morris: Transovarian passage of antibodies following naturally acquired encephalitis infection in birds, 165
Scherr: George H.: The effect of cortisone and somatotrophic hormone on vaccinia virus lesions and benzyl alcohol toxicity in the embryonated egg, 160
Schistosoma mansoni, Anti-egg precipitins in the serum of humans infected with, 86
Schwab, John H.: Host factors in experimental group A streptococcal infections. The role of tissue thromboplastin, 267
Scott, J. K.: Relationship between *Bartonella muris* infection and acute radiation effects in the rat, 302
Severens, James M.: The effect of cortisone and somatotrophic hormone on vaccinia virus lesions and benzyl alcohol toxicity in the embryonated egg, 160
Sherwood, Noble P.: Studies on streptococci.
V. A study of streptococcal proteinases, 1
Smith, W. V.: Salmonella in swine, cattle and the environment of abattoirs, 236
Somatotrophic hormone, The effect of cortisone and, on vaccinia virus lesions and benzyl alcohol toxicity in the embryonated egg, 160
Sooter, Clarence A.: Transovarian passage of antibodies following naturally acquired encephalitis infection in birds, 165
Spirochetes, The production of fusospirochetal infections in guinea pigs with recombined pure cultures, 275
Stamm, Donald D.: Transfer of maternal neutralizing antibodies against eastern equine encephalomyelitis virus in birds, 179
Stannard, J. N.: Relationship between *Bartonella muris* infection and acute radiation effects in the rat, 302
Stanton, Mearl F.: Chemotherapeutic studies of alloxan, dehydroascorbic acid, and related compounds in murine haemobartonellosis, 182
Streptococci, studies on, 1
Experimental nephritis due to type specific streptococci, 191, 202
Host factors in experimental group A streptococcal infections, 267
Sturgeon, J. M.: Transovarian transmission of neutralizing substances to western equine and St. Louis encephalitis viruses by avian hosts, 168
Sutton, R. M.: The production of fusospirochetal infections in guinea pigs with recombined pure cultures, 275

Taliaferro, Lucy Graves: Effect of X rays on hemolysin formation following various immunization and irradiation procedures, 117
Further studies on the radiosensitive stages in hemolysin formation, 134
Taliaferro, William H.: Effect of X rays on hemolysins formation following various immunization and irradiation procedures, 117
Further studies on the radiosensitive stages in hemolysin formation, 134
Terramycin, The reversal of the toxicity of, by multivalent cations, 291
Thromboplastin, Host factors in experimental group A streptococcal infections. The role of tissue thromboplastin, 267
Tomimura, Tamotsu: Cerebrospinal nematodiasis as a provoking factor in Japanese B encephalitis: an experimental approach, 260
Truffelli, G. Thomas: Studies on streptococci.
V. A study of streptococcal proteinases, 1
Trypanosoma equiperdum, The effect of oxophenarsine on the phosphate metabolism of, in the rat, 92

Vaccinia, The effect of cortisone and somatotrophic hormone on vaccinia virus lesions and benzyl alcohol toxicity in the embryonated egg, 160
van der Hoeden, J.: The pathogenicity of leptospiras to field rodents in Israel (a new test animal for use in leptospira research), 213
Victor, Joseph: Mechanisms of citrate inhibition of phagocytosis and opsonization, 285

Watson, Dennis W.: Host factors in experimental group A streptococcal infections. The role of tissue thromboplastin, 267
Weinberg, Eugene D.: The reversal of the toxicity of oxytetracycline (terramycin) by multivalent cations, 291
White, Laurens P.: Heaptic function and other physiologic studies in monkeys with experimental pneumonic plague, 226
Wittenberger, Charles L.: The effect of cortisone and somatotrophic hormone on vaccinia virus lesions and benzyl alcohol toxicity in the embryonated egg, 160
